Niagara CT

Greater efficiency, lower costs, unlimited supply

KEY FEATURES

- Ambient, chilled and sparkling water options
- Cooled temperature 3°C - 10°C
- High capacity counter-top model
- Anti-flooding valve
- Allows jug filling
- Warning lights
- Drip tray
- Energy saving stand-by mode
- Optional electronic control panel
- With **pura3000** filtration
- Floor-standing model available

The Niagara is our largest capacity bottling system. This robust, solid and high-performance cooler is ideal for large uses, allowing instant delivery of large quantities of ambient, chilled or sparkling water options. The counter-top unit is ideal for use on bar, café, and restaurant worktops.

DIMENSIONS

| | |
|----------------------------|-------|
| 65 model height: | 510mm |
| 65 model width: | 422mm |
| 65 model depth: | 490mm |
| 65 model dispense height: | 320mm |
| 120 model height: | 510mm |
| 120 model width: | 482mm |
| 120 model depth: | 490mm |
| 120 model dispense height: | 320mm |
| 180 model height: | 510mm |
| 180 model width: | 532mm |
| 180 model depth: | 490mm |
| 180 model dispense height: | 320mm |

The Niagara is an all-encompassing product, instantly dispensing large amounts of still and sparkling, chilled and ambient water. Simply connect it to the water mains to begin using the complete service.

TYPICAL SPECIFICATION

The Niagara's internal taps can dispense water continuously or intermittently as desired.

The "ice bank" with double coil improves the efficiency of simultaneous chilled and sparkling water dispensing. This high performance cooling technology cools considerable quantities of water and enables the dispensing temperature to be kept constant even when continuously dispensing many litres.

The optional CU+ SAFEPATH ensures bacterial immunity for the cooler, providing permanent and constant protection against the formation of biofilms.

The dispenser is equipped with a water pressure reducer, CO2 regulator and the use of AISI 304 stainless steel for the sensitive parts of the casing. The drip tray is designed to facilitate optimal jug positioning and the safety valve prevents leakages caused by accidental faults inside the machine.

OPTIONAL ELECTRONIC CONTROL

Our electronic control is available on our sparkling models and allows you to customise the water cooler's functions and monitor its use in real time, optimising maintenance.

- Set the quantity of water supplied automatically. Fill glasses (small serving) or jugs (large serving)
- Control the temperature of the ice bank
- No water warning light
- Optional bottle guides

Branded Glass Water Bottles

Add your own company logo to our 750ml glass bottle.

Through our bespoke printing service you can brand as little as 60 bottles with your own company design and logo. Simply supply us with your vector artwork. Set-up, delivery and full colour printing is included. All prices exclude VAT.

- Cut single-use, plastic bottled water
- Reduce the environmental impact of transportation and packaging waste
- Gain fridge and storeroom space
