INSTALLATION OPTIONS

KEY FEATURES

- · Recess mounted, filtered water dispenser
- Manual push button activation
- Non-refrigerated (optional refrigerated chiller)
- Suitable for busy HORECA environments
- · Battery powered
- Zero floor-level footprint
- Full filter change and servicing package included
- Built-in drip tray
- No power or waste connections
- With Elkay filtration

The Elkay LivEZ Wall Mounted Manual Filtered Bottle Filling Station is a push-button activated in-wall, filtered water dispenser, designed for use in busy indoor hospitality environments. Made of tempered glass and stainless steel, this stylish, durable unit offers reliable performance. The LivEZ combines a classy appearance with energy efficient performance and easy maintenance.

The integrated Green Ticker informs users just how many 20oz plastic water bottles have been saved from waste through the use of the refill station.

This is a non-chilled version for those who are happy with ambient temperature water. Optional refrigerated chiller available.

DIMENSIONS

Height:	521mm
Width:	426mm
Depth:	116mm

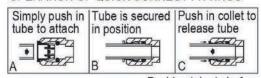

IMPORTANT!
INSTALLER PLEASE NOTE:
This water cooler has been designed and built to provide water to the user which has not been altered by materials in the cooler waterways. The grounding of electrical equipment such as telephone, computer, etc. to water lines is a common procedure. The grounding may be in the building but may also occur away from the building. This grounding can expect electrical feed back into a water cooler creating an electrical feed by the cooler creating and cooler creating the cooler creating and cooler creating the cool grounding can cause electrical feedback into a water cooler creating an electrolysis which creates a metallic taste or causes an increase in the metal content of the water. This condition is avoidable by installing the cooler using the proper materials as shown

NOTICE

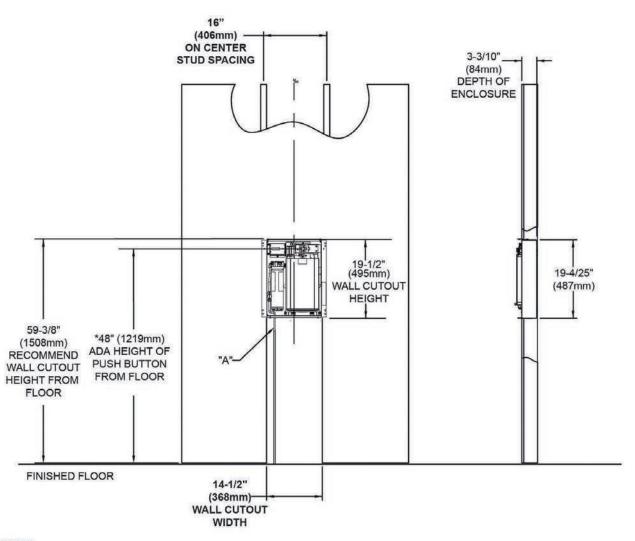

This built in water dispenser must be connected to the water supply using a dielectric coupling. The filter is furnished with a non-metallic ball valve which meets this requirement. The drain trap which is provided by the installer should also be plastic to completely isolate the cooler from the building plumbing system.

These products are designed to operate on 40 psi to 105 psi supply line pressure.

OPERATION OF QUICK CONNECT FITTINGS

Pushing tube in before pulling it out helps to release tube

LEGEND:

A = Recommended location for 3/8" (10mm) water inlet, to connect with 3/8" (10mm) shut off valve in filter box. *Height to top of wall cutout will need to be less than the recommended 59-3/8" (1508mm) height to meet the ADA requirement for the push button location of 48" (1219mm).

Information correct at time of printing, please check manufacturer website for latest installation information.
