KEY FEATURES

- ✓ Cold and ambient / cold, sparkling and ambient water options
- ✓ Ultra-hygienic, back-lit, touch-sensitive control panel, with antimicrobial protection
- ✓ Eco mode - an intelligent sensor sends the appliance into standby mode when light levels are low, or after a period of inactivity
- ✓ Optional touchless operation via Sensorbeam® Cabinet
- ✓ Colour changing dispense illumination
- ✓ 290mm dispense height
- ✓ Energy-saving Dry Chill® cooling system
- ✓ Anti-flood detection
- ✓ Optional internal alarmed waste kit
- ✓ Optional Mercury-free, chemical-free, and energy-efficient LED-UV water purification
- ✓ Full filter change and servicing package included
- ✓ With **pura** filtration
- ✓ Built in the UK

The E6 water cooler dispenser combines intelligent eco-friendly technology, energy-efficiency and powerful performance. It features a touch-sensitive control panel, designed to significantly enhance hygiene for users, and reduce the potential for cross-contamination. The large dispense area is designed to fit tall sports bottles and jugs, making hydration simple, and reducing the requirement for disposable cups. From boardroom tea service to sports hall water bottles, this water machine delivers uncompromised service.

DIMENSIONS

Height:	1,330mm
Width:	320mm

AVAILABLE ACCESSORIES

Recyclable Paper Cups

- 7oz recyclable paper cups
- 4oz paper cones

Thirsty Work Water Bottles

Thirsty Work 500ml reusable stainless steel water bottles. 67mm x 270mm high.

Bespoke Printed Water Bottles

Add your own company logo to our 500ml reusable stainless steel water bottles. Available in a range of colours.

Touchless Dispense Foot Control

Control your water dispenser with foot control. The SensorBeam™ Base cabinet is an innovative, illuminated floorstanding base with projection touchless dispense, eliminating the risk of spreading bacteria on touch-panels.

Accessories

- CO² refills
- Ultra-violet filter kit
- Waste kit overflow sensor

T-Safe Filter Kit

Primarily for healthcare environments, this added layer of protection can be installed at the point of dispense to capture any potential bacteria, waterborne pathogens or other contaminants.
