HOSPITALITY SECTOR CASE STUDY

Courtyard Exeter Sandy Park - Marriott

A self serve filtered water system for hotel guests.

Courtyard is the largest hotel in the Exeter area with 250 bedrooms. The customer chose to install a guest facing self service system on their busy ground (3rd floor) bar for guests and staff to have unlimited refills and allow the hotel to eliminate buying in single use bottles for the hotel bedrooms.

One twin Pura branded Cobra font, table-top drip tray and under-counter J-Class 45 unit was installed. The customer also sells their own branded reusable sports bottles to guests for refilling.

"Henning was keen to work with a local business and install a free drinking water tap in their main bar area, to support Marriott's Serve360 Sustainability and Social Impact policy and reduce the hotel's resilience on single use plastic bottles in their 250 bedrooms."

The Pura system has helped eliminate thousands of bottles in the first year, saving significant waste and cost, and has helped Henning save valuable storage space, which is at a premium. He's very happy with the service provided and the system has worked perfectly."

H.K. Courtyard Exeter Sandy Park

A counter-top auto-fill still and sparkling BluPura Bar unit has also been installed into their restaurant. This allows staff to quickly fill 750ml still and sparkling water bottles, even at the busiest of times.

Marriott have also partnered with PuraServe for the supply of bespoke branded re-usable glass bottles, printed with their restaurant logo 'The View'. This allows them to serve their own branded premium filtered bottled water, while reducing waste.
