HOSPITALITY SECTOR CASE STUDY

The Bristol Hotel

The Bristol Hotel approached Thirsty Work in order to find a solution across the hotel for a number of hydration solutions for them.

One of the first objectives was to reduce single-use glass waste in the events and conferencing centre where traditional bought-in bottled water was originally being supplied. The solution Thirsty Work provided was a counter-top still and sparkling high-volume dispenser to enable the hotel to bottle significant amounts of 750ml serve water in our Pura branded bottles.

The provision of hydration of staff was also identified and two separate water coolers were installed in the staff canteen and office to offer cold still and ambient water options.

"We have chosen Pura for their trustworthiness. Previously, we had issues with our suppliers which affected our services to guests. Since we have started working with Thirsty Work we have accommodated thousands of delegates in the conference centre."

The water tastes as clean as a spring water which can be challenging due to the hardness of the Bristolian water."
